DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a rail assembly for supporting a blanking tool insert, classified in class 225, subclass 97.
 - II. Claims 14-21, drawn to a rail assembly for supporting a blanking tool insert, classified in class 225, subclass 103.
 - III. Claims 22-28, drawn to a frame assembly, classified in class 225, subclass 104.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III and I, II are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations have utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the combination does not require a lip in the outer face of the clamp piece (claims 10 and 21). The subcombinations have separate utility such as they do not require a rigid outer frame (claim 22, line 3).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3724

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
